

SSW215-A Individual Software Engineering
Fall 2022
Assignment #2
Due Wednesday, September 28, 10:00 am

The purpose of this assignment is to give you the opportunity to practice and apply the knowledge gained to solve real problems. This ultimately will allow you to learn how to use CSS style to your HTML webpage!

In this homework assignment, you are expected to use external CSS styling to apply styles to Starbucks coffee company webpage. Please follow the instructions below to complete your assignment task:

Create an external CSS style sheet that will modify/style the HTML webpage document named starb.html posted in Assignment #2 on canvas as follows:

- a. The external CSS style sheet should apply a background-color: linen; to the body element of the HTML webpage document.
- b. The external CSS style sheet should apply a rgb color equivalent for the HEX value color #066104 to the heading level h1 in the HTML webpage document starb.html. Also, the external CSS style sheet should set the heading level h1 to margin-left: 40px; text-align: center.
- c. The external CSS style sheet should set the html paragraph element <p> to a text-align: justify
- d. The external CSS style sheet should set the color of the first h3 heading level in the HTML webpage document to HEX value #066104
- e. The external CSS style sheet should set the color of the second h3 heading level in the HTML webpage document starb.html to the HSL color value equivalent of HEX value #066104
- f. The external CSS style sheet should set the color of the third h3 heading level in the HTML webpage document using the color name color: green
- g. The external CSS style sheet should apply text-decoration: line-through; to the ordered list element Cappuccino and color: red; to the "Espresso" list item
- h. The external CSS style sheet should set the border of the table element to border: 1px and also center the table accordingly. The h4 level heading should also be set to center and its color should be set to color: maroon
- i. Save your HTML code file with the name starbucks.html and your external CSS stylesheet with the name sb.css. Make sure your external CSS file and html are correctly integrated and working properly. Submit both the HTML webpage document, external CSS stylesheet and a screenshot of a browser display of your new CSS styled webpage.
